

Pantesin®
the cholesterol regulator
by
DAIICHI Fine Chemical

Pantesin® is a high quality brand - pharmaceutical grade- of pantethine.

Pantethine as an intermediate in the conversion of Pantothenic Acid to Coenzyme A plays an important role in the metabolism of amino acids, carbohydrates and lipids.

Due to people's lifestyle changes resulting i. a. in bad blood fat- and cholesterol levels, pantethine seems to become an important ingredient in nutritional products to enhance one's health. Following benefits of pantethine could be detected by several studies:

- **Increases HDL-Cholesterol**
- **Increases Apo A-I and Apo AQ-II**
- **Lowers LDL-Cholesterol**
- **Lowers Triglycerides**
- **Accelerates activity of lipid metabolizing enzymes in the arterial wall**
- **Accelerates beta-oxidation of fatty acids in the liver and arterial wall**

Pantesin® is currently available in two forms: a highly compressible 55% powder and an 80% liquid.

Pantesin® HF 55

This high-flow, dry granule is a highly compressible powder containing 55%, pharmaceutical grade pantethine, and a proprietary blend of excipient. This ingredient is specially designed to easily compress high dose pantethine into tablets and fill capsules with minimal processing required. No other pantethine on the market today is as easy to use as Pantesin® HF 55.

Pantesin® LQ 80

This high potency liquid has been designed for use in the manufacture of soft gelatin elastic capsules. It is an excellent choice for high-dosage forms and multiple ingredient formulations.

Make Pantesin® your pantethine source of choice for your application.
