

VITAMIN A PALMITATE 1.0M (Toc.) / 1.7M (Toc.)

Definition

Vitamin A Palmitate is an active ingredient for cosmetic products. It releases Vitamin A on contact with enzymes in the skin. Vitamin A stimulates cell growth and increases enzyme activity. Therefore Vitamin A is a very effective active ingredient for anti-wrinkle and anti-aging products.

Vitamin A Palmitate 1.0M ($\approx 1.000.000$ IU/g) is prepared from synthetic Retinyl Palmitate by dilution with sunflower oil and 2% DL-alpha Tocopherol as an antioxidant.

Vitamin A Palmitate 1.7M ($\approx 1.700.000$ IU/g) is an oily concentrate prepared from synthetic Retinyl Palmitate stabilized with 2% of DL-alpha Tocopherol.

Synonymous names

all-(E)-retinol palmitate
Retinyl Palmitate
all-trans retinol palmitic acid ester

Official adopted names and nomenclatures

CAS No.: 79-81-2
EINECS No.: 201-228-5
INCI name: Retinyl Palmitate
CN code: 2936 2100

Producer: ZHEJIANG MEDICINE CO. Ltd., China

Kyowa Hakko Europe GmbH
Daiichi Fine Chemical Division

SPECIFICATION*

Chemical name: all-(E)-retinol palmitate

Chemical structure:

Molecular formula: $C_{36}H_{60}O_2$

Molecular weight: 523,87

Appearance: yellow, oily liquid, partial crystallization may occur in highly concentrated solutions

Identification: Thin-layer chromatography: conforms

Tests:

Acid value: max. 2,0

Peroxide value: max. 10,0

Related substances: Ultraviolet and visible absorption spectrophotometry

$$A_{300}/A_{326} = \text{max. } 0.60$$

$$A_{350}/A_{326} = \text{max. } 0.54$$

$$A_{370}/A_{326} = \text{max. } 0.14$$

Content/assay: A. UV absorption spectrophotometry
B. liquid chromatography
95,0% to 110,0% of Vitamin A Palmitate content stated on the label

*meets the quality requirements of the Ph. Eur. Monograph for Vitamin A Concentrate (oily form), synthetic

Other specification

Heavy metals (as PB): ≤ 10 ppm

Arsenic: ≤ 2 ppm

Vitamin A Palmitate (Toc.) meets all quality requirements of the relevant monographs of USP and FCC, when tested according to these compendia.

Storage and packaging

| | |
|---------------------|---|
| Storage: | Store in unopened original container and in cool conditions (8°C to 20°C). Product should be protected from light, heat, oxygen and humidity. Keep the container tightly closed. Once opened, it is recommended to use the remaining contents as quickly as possible. |
| Standard packaging: | 5 kg aluminium tins 20 kg or 50 kg metal drums |
| Expiry date: | In unopened original packaging and under adequate storage conditions (8°C to 20°C) minimum 12 months after manufacturing date. |
| Solubility: | Soluble in fats, oils and hydrogenated carbons. The solvent should not contain peroxides. Insoluble in water. |

| | | |
|----------------|------------------------|-----------------------|
| Microorganism: | aerobic bacteria count | ≤ 1000 cfu/g |
| | funghi and yeast | ≤ 100 cfu/g |
| | coliform species | ≤ 30 MPN/100g |
| | salmonella | not detectable in 25g |
| | st. aureus | not detectable in 1g |

| | |
|----------------|---|
| Toxicity data: | The CIR expert panel concludes that Retinyl Palmitate and Retinol are safe as cosmetic ingredients in the present practice of use and concentration. A CIR report is available. |
|----------------|---|

Recommendations for cosmetic use

According to Gesellschaft Deutscher Chemiker (GDCh)¹⁾ the following Vitamin A Palmitate supplementations are recommended:

| | |
|---------------------|---------------|
| Day cream: | 0,05% - 0,15% |
| Night cream: | 0,10% - 0,30% |
| Hand cream: | 0,05% |
| Body lotion: | 0,05% - 0,10% |
| After sun cream: | 0,10% - 0,20% |
| After sun lotion: | 0,05% - 0,10% |
| Oil based products: | 0,30% |

The maximum quantities legally permitted for use in cosmetics must be observed.
